Sl. No.	Subject	Page No.
1	List of Acronyms	I
2	List of Tables	vi-viii
3	Fact Sheet	ix- xxii
4	Study : At a Glance	xxiii- xxx
Chapter-I		
1.1	Background	1
1.2	Context Setting	1
1.3	Objective of the Study	1
1.4	Study Design and Methodology	2
1.4.1	Study Design and Methodology	3
1.5	Selection of Districts	4
1.6	Manpower deployed for the Study	8
1.7	Data entry, analysis and reporting	8
1.8	Organization of the Report	8
Chapter –II		
2.1	Socio-Economic and Demographic Characteristics of Eligible Women	9
2.2	Health Seeking Behaviour of Respondents	10
2.3	Family Planning	11
2.4	Family Planning Services Ever Aailed and Source of Services Aailed	15
2.5	Current Use of Family Planning	15
2.6	Current Use of Family Planning by Specific Method	16
2.7	The Motivators who helped the eligible couple decide and adopt a FP method	17
2.8	Use of Family Planning Methods by Age and Parity	18
2.9	Distribution of Current Users of Modern FP Method by Duration of Use	19
2.10	Users of Temporary Spacing Methods Intending to Adopt IUCD in Future	20
2.10.1	Spacing Users Intending to Adopt Sterilization in Future	21
2.11	Ever User of Family Planning Methods	21
2.12	Duration of Non-Use/ Discontinuation of Family Planning by Ever Users	22
2.13	Duration of FP Method Use before Discontinuing the Method	23
2.14	Reasons for Discontinuation	23
2.15	Reasons for Not Opting for Sterilization Even after Completing Family Size	24
2.16	Supply Situation of Condoms in last 3 months	26
2.17	Use of Commercial and Socially Marketed Supply of Condoms	27

2.18	Required Information/Check-Up Received Before Being Prescribed OCP	28
2.19	OCP Users Received Follow-up Support	29
2.20	OCP Clients Reporting Problems Faced within 3 months of Use	29
2.21	Clients Reaching Out to the Facility or Provider for Problems/ Side Effects Faced During OCP Use	30
2.22	Source of Supply of OCP	30
2.23	Quantity of Oral Contraceptive Pills Received at a Time	31
2.24	Regularity of OCP Supply	32
2.25	Quantity of OCP Cycles Received in Last Three Months	32
2.26	Regularity of Use of OCP by Clients	32
2.27	Whether had to pay for obtaining OCP Supply	33
2.28	Knowledge on Effectiveness of Copper-T/ IUCD	35
2.29	Post Insertion Follow-up and Check-up Received for IUCD	37
2.30	Complications within Three Months of Insertion	39
2.31	Received Help for Complications Post IUD Insertion	40
2.32	Paid Money for Sterilization Services	42
2.33	Post Sterilization Complications Reported	44
2.34	Pre-Operative Check-ups	45
2.35	Follow-up check-ups after sterilization	45
2.36	Support Received from ASHAs/ANM in managing complications	47
2.37	Client Satisfaction from the Sterilization Services Received	48
2.38	Socio-Economic and Demographic Background of Mothers-In-Law	49
2.39	Opinion on Decision Concerning Education of Children in the Family	50
2.40	Decisions Concerning Health in the Family	51
2.41	Opinion on Role of Daughters-in-Law in Taking Decision on Children's Education	52
2.42	Opinion of MILs on Daughters-in-Law Taking Decision on Use of Family Planning	53
2.43	Opinion of MILs on Daughters-in-Law Taking Decision in Other Family Matters	53
2.44	If decisions for daughter-in-law also applicable in case of her daughter	54
2.45	Ever used any family planning method	55
2.46	Awareness on use of family planning method by son/daughter-in-law	56
2.47	View of MIL on whether it was essential to have a grandson	57

2.48	Encouraging son/daughter-in-law to have children till a grandson is born	58
Chapter -III		
3.1	Work Status before joining as ASHAs	60
3.2	Population covered by ASHA	60
3.3	Interaction with ANM	61
3.4	Occasion/place of meeting and purpose of interaction	61
3.5	Roles and Responsibilities of ASHA	62
3.6	Issues on which ASHA counsels women during home visits	63
3.7	FP methods for which ASHAs motivated clients	63
3.8	Problems faced during motivation for Female Sterilization	64
3.9	Problems faced during motivation for Male Sterilization	64
3.10	Problems faced during motivation for Copper-T	65
3.11	Referral of male sterilization cases by ASHAs	65
3.12	Referral of female sterilizations cases by ASHAs	66
3.13	Knowledge about years of effectiveness of Cu-T	66
3.14	Number of sterilization/IUCD clients motivated by ASHAs in last three months	66
3.15	Institutional deliveries in last three months	66
3.16	Post Partum family planning advice given	66
3.17	Age, educational background and years of experience	67
3.18	Years of working at the current place of posting	68
3.19	Number of villages served	68
3.20	Population served	69
3.21	Number of ASHAs supervised by ANM	70
3.22	Deliveries conducted by ANMs at their Sub-Centre	70
3.23	Home Deliveries by ANMs	71
3.24	IUCD insertion at the HSC by ANMs	72
3.25	Received PPIUCD training	73
3.26	Conducting Home visits and motivating clients for family planning	73
3.27	Challenges faced by ANMs during motivation for female sterilization	74
3.28	Challenges faced by ANMs during motivation for male sterilization	75
3.29	Challenges faced by ANMs during motivation for IUCD insertion	76
3.30	Scheduled meetings with ASHAs for review of work	77
3.31	Whether ASHAs motivating clients during home visit	77
3.32	Whether ASHAs referred IUCD clients to ANM	77
3.33	Whether ASHAs Motivated and Referred Sterilization Clients to ANM	78
3.34	Knowledge of ANMs on years of effectiveness of Cu T	78

3.35	Referrals of male sterilization clients by ANMs	79
3.36	Preferred health facility for referral of female sterilization client by ANMs	79
3.37	Whether facility of male sterilization available in the PHC/CHC	80
3.38	Whether facility of female sterilization available at the PHC/CHC	80
Chapter -IV		
	Interaction with Policy Makers/Senior Government Representatives	82-83
Chapter -V		
	Summary	84-89
	Conclusion	90
